

SPECIFICATIONS: HOSTED SOLUTION

Cloud-Based Security

Entry-Master® Hosted Solution is the power of our premier security and card access system running the bulk of the server hardware and "logic" on the "cloud" - online through the internet.

The flagship **System V** Security platform was initially designed for medium to large-sized enterprises with high volume card use and the need for instant response times.

The **Hosted Solution** is scalable, runs on the "cloud" and thus is more affordable for smaller sites with added functionality and no loss in speed or reliability.

Card Num.	Cardholder Name	Last Used	In/Out	User's Name
07703108	HOSACK, TRICIA	09/07/2017	Forgive	THE FITNESS CONNECTION

Hosted Solutions Features:

- "Cloud" Based Card Access Control
- Accessible from any Browser-based Device
- Web or IP-Camera Monitoring
- Digital Facility Mapping Available
- Alert Notification on any Mobile Device
- Door and Motion Detection

Hosted System Benefits:

- No Recurring Software Fees
- No Seat Licenses
- Works with Windows, Mac and Linux
- Virus-Proof and Hacker-Resistant

When the **Hosted Solution** is being installed to replace an existing card access system (retrofit) Entry-Master can typically utilize existing system components (hardware, locks, cards, etc.).

Specifications: Hosted Solution
