

COMMERCIAL SECURITY CARD ACCESS CONTROL

PRODUCT SPECIFICATIONS

Entry-Master[®] System V Card Access System combines multiple scanning technologies with “state-of-the-art” PC components and comprehensive, field-proven access control software. The result is a progressive access control system that is flexible, yet easy to understand and operate.

Entry-Master[®] Reader
Interface Board
EMRI-2

A complete *Entry-Master*[®] System includes a Pentium computer, multi-user/multi-tasking software to allow simultaneous use of up to 64 workstations and 64 spooled printers. The *Entry-Master*[®] System is integrated with card readers, alarm contacts, electric locks/strikes and/or barrier/slide gates. Modular hardware and software design allows future upgrade of your *Entry-Master*[®] System components without becoming obsolete.

Simply Secure[™]

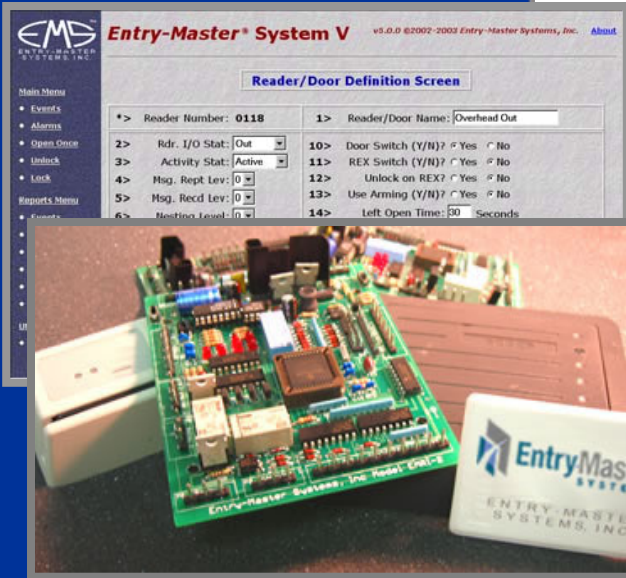

“*Entry-Master*[®] card access control and security software is virtually impervious to hackers and to the viruses threatening systems today.”

“In our 20 year history, no *Entry-Master* client has ever had their security system compromised by either a hacker or from a virus.”

Simply Secure™
