

SPECIFICATIONS: SYSTEM V

Web-Based System V

Entry-Master® System V is our premier security and card access system. The **System V** Card Access Control System was initially designed for medium to large-sized systems where the volume of card use traffic is high, and instant response times are critical. In recent years, the system has been designed to be scalable and thus more affordable for smaller sites. Once an **Entry-Master** system is installed, it easily scales upwards to a larger platform with added functionality with no loss in speed or reliability.

Security System Options:

Our Web-based system is now available in 4 scalable platforms:

- Starter System** - Single site, up to 16 Doors
- Small Business** - Single site, up to 64 Doors
- Commercial System** - Up to 4 sites, up to 256 Doors
- Enterprise Edition** - Up to 80 sites, up 5,000 Doors

System V Features:

- Customized Card Access Control
- CCTV and IP-Camera Monitoring
- Real-Time Monitoring of Facility via Digital Map
- Mass Notification Integration
- Interior Gate Control and/or Metal Detectors
- Classroom Door Monitoring
- Wireless door and motion detection integration

System V Benefits:

- No Recurring Software Fees
- No Seat Licenses
- Integrates with most standard hardware
- Works with Windows, Mac and Linux
- Virus-Proof and Hacker-Resistant

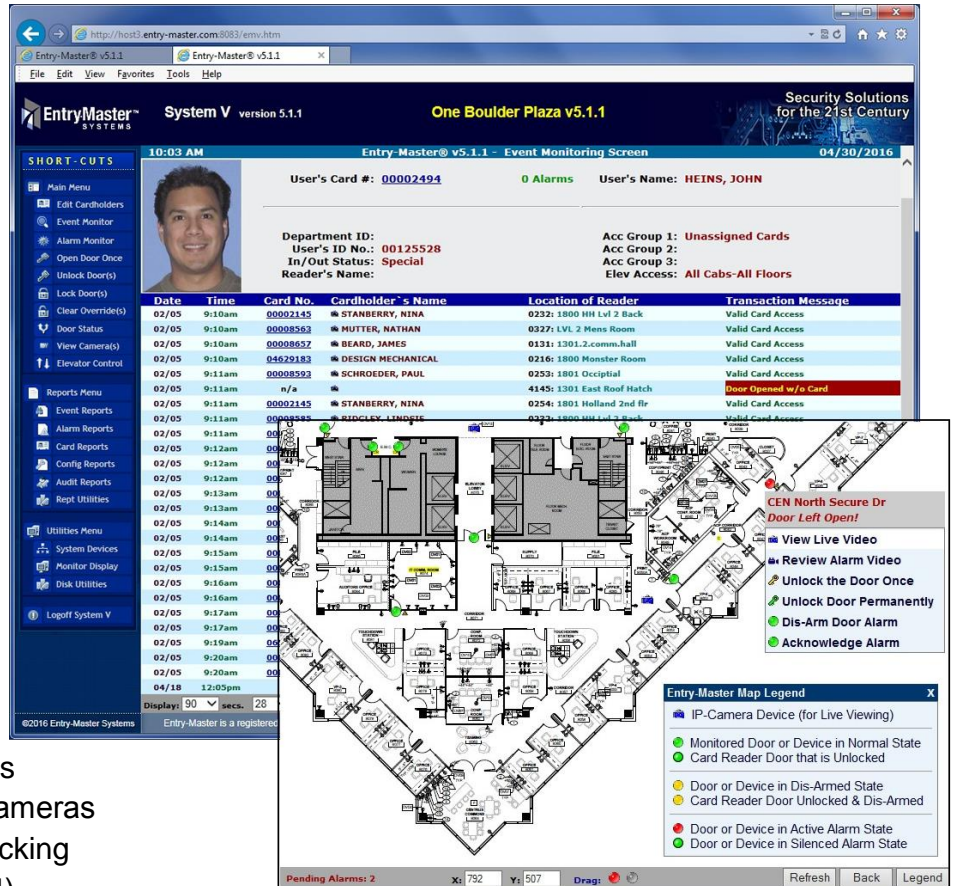

Specifications: System V

System V Specifications

- Virus-proof software design
- Web-based operation
- Quick card history lookup
- 2 million cardholder capacity
- User-defined audible alarms
- 63 time zones
- 10,000 access groups
- 5,000 holiday schedules
- Real-time alarm monitoring
- Interactive alarm maps
- Smart phone enabled via browser
