

Lesson 13 – Accessing the Online Monitoring Screen

The On-line Monitoring screen helps operators determine the cause of problems when they occur. Some error conditions cause the system to issue an audible sound (that is, a beep). This beep alerts the operator to an abnormal or exception transaction.

Some exception transactions are severe. When a severe exception transaction occurs, the system issues a constant beep until the operator acknowledges the exception. To acknowledge the beep, press the spacebar once.

To display the On-line Monitoring screen from the, Select **Option 4, Enter Event Monitoring** from the **Main Menu** (See [Chapter 2 - Lesson 1, Logging into the System](#)).
