

## Lesson 13 – Accessing the Online Monitoring Screen

The On-line Monitoring screen helps operators determine the cause of problems when they occur. Some error conditions cause the system to issue an audible sound (that is, a beep). This beep alerts the operator to an abnormal or exception transaction.

Some exception transactions are severe. When a severe exception transaction occurs, the system can be configured to issue a single klaxon sound, or a constant klaxon until the system operator acknowledges the exception. To acknowledge the exception, click on the “**Alarms**” button.

To set up audible alarms, contact your **Entry-Master** dealer.

To display the **Event Monitoring** screen from the, Select **Option 4 – Enter Event Monitoring** from the *Main Menu* (See [Chapter 2 - Lesson 1, Logging into the System](#)):

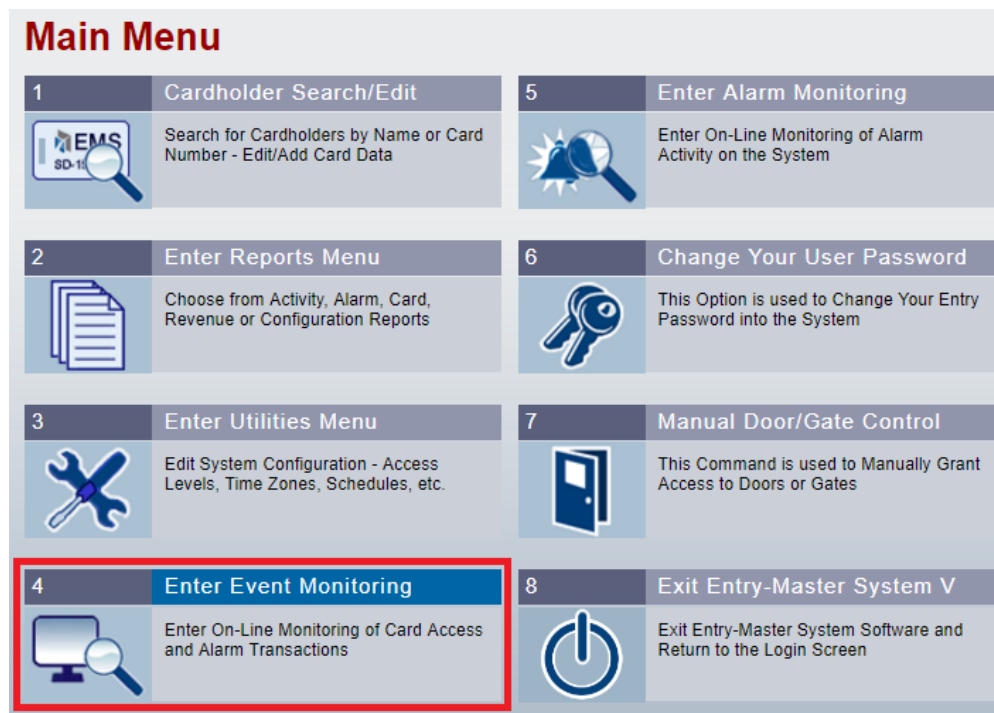

Figure 2-13-1. Main Menu – Enter Event Monitoring

The **Event Monitoring** screen is shown below (Figure 2-13-2):

Figure 2-13-2. Entry-Master Event Monitoring Screen

This is the *On-line Event Monitoring* screen.

This screen displays information about system activity.

The top part of the screen displays cardholder information for the most recent activity.
